Declarations of Interest of Governors

The governors of Frieth School Governing Board are committed to maintaining high standards of transparency, integrity and accountability in accordance with statutory governance requirements.

All governors are required to complete a declaration of business and pecuniary interests upon appointment to the Governing Board. Governors must also review and update their declarations annually, or sooner where any relevant changes arise.

Declarations of interest are a standing agenda item at all full governing board and committee meetings. Governors are required to declare any potential conflicts of interest relating to items under discussion and, where appropriate, withdraw from related decision-making in accordance with the board's governance procedures.

Relevant information is also included within the school's annual Schools Financial Value Standard (SFVS) return.

At the present time, there are no declared business or pecuniary interests recorded for members of the Governing Board.

The register of interests is maintained by the school and is available for inspection by authorised bodies and individuals, including Ofsted inspectors, internal auditors and relevant local authority or education officers, in line with statutory and data protection requirements.
